WORK EXPERIENCE

Junior Web Developer Studio 93

12/2023 - Present

Lahore

As a Junior Web Developer, I focused on developing responsive, dynamic web applications and collaborating with senior developers to implement new features. I contributed to enhancing backend functionality through the design and implementation of RESTful APIs. Additionally, I collaborated closely with cross-functional teams such as UX/UI and QA to ensure high-quality, user-centric web solutions.

Achievements/Tasks

- In the Grounds app project, I worked with the UI team for managing the UI using NEXT.js and Tailwind CSS, while incorporating animations with GSAP. Additionally, I also worked with the backend team for implementing user authentication for login and signup functionalities, leveraging Firebase to ensure seamless user experiences.
- In CropReal project, worked with the UI team for crafting engaging landing and authentication pages. Utilizing React.js, CSS, Bootstrap, and GSAP, I ensured smooth user experiences and visually appealing designs for seamless navigation and interaction.
- Developed the landing pages based on Figma designs, employing Chakra UI for the design components and integrating animations using the AOS library.

Trainee Software Engineer Seebiz Pvt. Limited

06/2023 - 12/2023

Lahore

Completed a rigorous 6-month software development training, mastering HTML, CSS, and JavaScript fundamentals, and advancing to proficient levels in React and Node.js. Developed a strong foundation in full-stack web development

Tasks

- Designed and implemented a quiz web application using HTML, CSS, and JavaScript.
- Crafted a todo web application with the help of React, and CSS. Used local storage for data saving purposes
- Developed a full-stack CRUD application using Express.js and Mongoose, for creating, retrieving, updating, and deleting data within a MongoDB database

EDUCATION

BS in Computer Science Government College University, Lahore

09/2019 - 09/2023

3.1/4.00

SKILLS

DSA

OOP

JavaScript

TypeScript

Chakra UI

Tailwind CSS

Bootstrap

React JS

Next JS

Context API

React Router

Node

Express

Mongo DB

PERSONAL PROJECTS

UI and Authentication Clone:

- Developed a UI clone of the Rest App using React, TypeScript, and Tailwind CSS. Firebase was utilized for authentication, ensuring secure access to private, public, and restricted routes, which were implemented using React Router DOM.

Chemical Inventory Management System

- Developed a web-based Chemical Inventory Management System to facilitate the tracking, monitoring, and management of chemicals within a laboratory or industrial setting. The project was developed with the help of React, Node, Express and Mongo DB.

CERTIFICATIONS

Amal Fellow:

Developed business skills (e.g., communication, Leadership, problem solving, teamwork, etc.) By investing 150 hours that will help me make a deeper impact on the job.

HackerRank

Developed the basics of Javascript, React, React-Router-Dom and Context API to hone my skills for a bright career
